

Globalstar GSP-1700

The Smallest Satellite Phone in this "Neck of the Woods"

The GSP-1700 is the smallest and lightest satellite phone from Globalstar. The new ergonomic design makes this handset convenient for keeping in contact from remote locations.

The Globalstar phone offers an ergonomic design that makes it comfortable for hand-held operation. The phone measures 225cc in total volume and weighs 200 grams (including battery). **The height is 5.3", the width is 2.2" and the thickness is 1.3"**. The antenna, when held in a vertical position, communicates with the Globalstar satellite at elevations more than 10 degrees above the horizon. The Globalstar antenna rotates and stows into the handset for convenience when not in use.

Features

Coverage Area

Offering service in over 120 countries, remote communication across the globe is a reality with Globalstar. All calls within the home coverage, which includes United States, Canada and Puerto Rico, are included with the available Service Plans.

Calls outside the home coverage area will be billed at long distance and roaming rates.

History – GSP1600 vs. GSP1700

Globalstar has updated its handheld phone from the GSP1600 series. The service will remain the same as they are both accessing the same satellite system. The new accessories for the GSP1700 will not be interchangeable with the GSP1600 Satphone.
