SolStar 1i & Dsi Rollable Solar Charger for Iridium Satellite Phones

Lightweight, durable, rollable solar charger. Charge up your Iridium phone while you talk or trek, anywhere on the planet!

Requires/connects with the standard 12-Volt Iridium Auto Accessory Adaptor (specific to Iridium 9500/9505 and 9505A models) and Female Adaptor (sold separately).

Features

- Uses solar power to charge batteries.
- Performs well in hot and cold.
- Includes reusable storage container.
- Easy to stow (rolls up to 3" diameter or lies flat).
- Charge the phone while on the move.
- Grommets enable secure tie down (in cases of wind or while on the move).
- In optimal sunlight, charge times are similar to the AC Travel Charger.
- Batteries must be placed in the phone while using the SolStar™ solar charger.
- 3 year warranty
- UV resistant/Weatherproof
- Durable construction with marine/grade components.

Specifications

Operating Voltage: 12 V
