VESSEL MONITORING SYSTEM

OMNICOM VESSEL MONITORING SYSTEM

CONNECTED. EVERYWHERE.

The OmniCom VMS beacon and PRISMA software offers fishing vessels full regulatory compliance via our tried and tested marine technology. NOAA certified; with twenty years on the water experience. Your fleet is always connected with OmniCom's global satellite coverage using the Iridium constellation. Low power consumption, secure communications and a 10" ruggedize touchscreen tablet provides a complete, simple to use, end to end VMS solution that tracks your vessels' movement for crew safety, and fisheries compliance and enforcement.

- End-to-end vessel monitoring
- Geofencing for compliance
- Global satellite coverage
- Ruggedised for marine environments

The Dome and the Junction Box installation requires basic standard tools such as a drill, an open end 13 mm wrench and a screwdriver kit as well as basic electrical tools such as a wire stripper and a crimping tool.

Mounting Configurations

- Horizontal railing
- Vertical mast
- Flat surface

MetOcean provides support in English & Spanish 7 days a week 365 days a year.

OmniCom VMS is certified in all NOAA fisheries regions in the United States.

Waterproof dome

telematics

OmniCom VMS

Built in surge protection

Internal battery will operate unit for 72 hours

Low Power consumption and works off 10V to 36V DC

Tamper proof with alert

Distress and test button with feedback LED's

10" ruggedized touchscreen Windows tablet

Windows App. Optimized for touch Screen. Easy to use

Prisma Connect is a subscription website for shore side with features such as:

- Shore to ship messaging
- Alert management
- Real time and historic tracking
- Completely private – only you can see your positions and data

WHY CHOOSE METOCEAN TELEMATICS?

Stay connected with voice, text, & data solutions.

Explore the world with confidence. Wherever you are, count on MetOcean Telematics to help you stay connected with remote communication devices that suit your needs. As a prominent Iridium Satellite Value-Added Reseller (VAR), we offer a selection of Iridium satellite equipment at the lowest price with 24/7 technical support.

THALES 200

Key Features

- Certus 200 Service (176 kpbs Up/Down)
- Robust, light-weight communications for at sea operations
- 100% global satellite coverage and low latency for critical data and voice communications
- Dependable maritime satcoms, from pole-to-pole
- Easily integrates VSAT with built-in preferred routing

GO! Marine

Key Features

- An Iridium GO! (including rechargeable LiON battery)
- Bulkhead mount
- External antenna (Your choice rail or pipe mounted)
- 30' antenna cable
- USB Charging with replaceable battery
- WIFI connectivity for your mobile devices
- Text, Voice & Data via custom app for your mobile device
