

Date: **25 Sep 2017**
Product: **Hughes 9502**
Release: **5.9.5.3**
Importance: **Optional**

Software version 5.9.5.3 for the Hughes 9502 terminal is an optional upgrade with some new features including PPPoE and support for Vodafone SIMs.

The upgrader file name is **9502_Upgrader_5_9_5_3_PC.exe** and is available on the Hughes BGAN support page: <http://www.bgan.hughes.com>
Alternatively, the software can be downloaded over the air from the Inmarsat upgrade server by using the Remote SMS feature and the ATCO command **_IGETFW**.

Release Notes for 5.9.5.3 (Since 5.9.5.1)

New Features

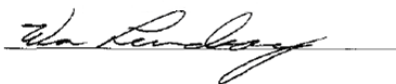

- Added support for PPP over Ethernet (PPPoE). Refer to the updated User Guide (Rev J) and Inmarsat PPPoE documentation for more details.
- Added support for operation with Vodafone SIMs.
- Added a configurable subnet mask for use in Relay Mode on the IP Settings web page.
- Added a configuration for Ethernet port Duplex operation on the Ethernet settings web page.
- Reverted the **at_isig** response to an integer value to avoid issues with certain external devices.
- Improved performance on PXA270 based platforms.
- Added support for Preferred Satellite info.
- The release includes BPS 2.4.15.
- The SVN for this release is 18.

Known Issues

- Remote SMS should not contain a standalone CR or LF. CR and LF are not required in remote SMS, but if included, should be part of a CR/LF pair.
