

## FLEETBROADBAND MULTI-VOICE SERVICE

SAILOR 500, 250 and 150 FleetBroadband

### GET UP TO NINE SIMULTANEOUS SAILOR FLEETBROADBAND VOICE CHANNELS

The new Inmarsat FleetBroadband Multi-voice service provides facility for up to nine simultaneous voice calls from a single SAILOR FleetBroadband terminal. This advanced new functionality brings FleetBroadband voice calling to the forefront and Thrane & Thrane SAILOR FleetBroadband is right there with it.

#### **Voice revolution**

SAILOR FleetBroadband and Inmarsat's new Multi-voice service will revolutionise on board and shore-to-ship voice communication. With the option of multiple voice lines vessels can now easily segregate bridge communication from other operational or crew calling facilities. This ensures that critical communication gets through even though other voice calls are taking place. Likewise calls can be initiated from several locations on board at the same time. With the Multi-voice service on board you are guaranteed high quality voice communication at a low cost.

#### **Available for all SAILOR FleetBroadband solutions**

All existing SAILOR FleetBroadband terminals will be compatible with the new service, through a firmware upgrade, whilst all new terminals will ship with the function already installed. The Multi-voice service is software based so no extra equipment is needed besides the additional handsets for the new voice lines. You can freely choose the type of handset you need and it is then just up to the user to determine how to use the flexible Multi-voice service.

The Multi-voice service is activated through a few simple steps within the existing web-interface of the SAILOR FleetBroadband terminal. The interface is accessible from any browser without installing any software on your computer and makes it possible to configure all aspects of your SAILOR FleetBroadband or troubleshoot remotely.

#### **Several voice calls simultaneously**

The number of Multi-voice lines you will be able to activate depends on which SAILOR FleetBroadband terminal is being used.

- SAILOR 500 FleetBroadband - 9 voice lines
- SAILOR 250 FleetBroadband - 6 voice lines
- SAILOR 150 FleetBroadband - 4 voice lines

In addition, SAILOR 500 and 250 FleetBroadband terminals can handle up to 16 handsets on one terminal, making your communication on board even more flexible.

#### **Multiple applications**

In combination with the built-in PABX functionality in the SAILOR FleetBroadband terminal and the highly advanced Thrane & Thrane IP Handset, FleetBroadband Multi-voice offers a fully featured voice calling system. Additionally, through integration with the new SAILOR 3771 Alarm Panel FleetBroadband, Voice Distress Calling is available, so vessel safety is prioritised regardless of how many users are on the line.

Subject to change without further notice.

## ABOUT THRANE & THRANE

A passion for innovation, proud traditions and our legacy in maritime communication equipment provides a unique platform for the development of reliable and technologically advanced products for seafarers all over the world.

Thus, Thrane & Thrane is the world's leading manufacturer of global satellite and radio communications equipment and we are proud to be able to offer a complete selection of reliable, innovative and user-friendly solutions for use at sea.

### THE SAILOR® OF THE WORLD

The renowned SAILOR brand in itself represents more than 50 years of experience in developing and refining maritime communication. We are matching the communication needs of the biggest ocean going vessels, fish- and workboats of any kind and

exclusive leisure yachts and sailboats in every spot of the world.

The portfolio includes maritime products from portable radios, VHF and MF/HF, Inmarsat C terminals, to complete GMDSS systems including LRIT and SSAS solutions, and a full range of maritime satcom products including Iridium, Mini-M, Fleet, FleetBroadBand, VSAT and satellite TV.

### WORLDWIDE ON BOARD SERVICE

Thrane & Thrane is famous for its World Class Service program. A network of On Board Service Centers offers on board service and repair all over the world. Every measure is taken to provide efficient first-time-fix support. We know that time is crucial for ship management, and we are proud to be your reliable service partner in any harbor at any time.
