

Fleet One

Fleet One

Innovative solutions for fishing

Fleet One has been designed to meet the specific operational demands of the near-shore fishing industry. It delivers data and voice simultaneously through a compact antenna, with specialised pricing plans and seasonal flexibility.

Access to communications at sea helps with fishing operations such as navigation, route planning and optimisation, fish finding, catch reporting and fisheries e-reporting.

For fishermen, access to low-cost calls and email keeps them in touch with home and boosts morale. They can check the news and sports reports – all while keeping a tight control on costs.

Fleet One operates on Inmarsat's I-4 satellites which are rigorously tested and proven as the go-to choice for commercial mariners around the world.

Safety services

Fleet One supports Inmarsat's free '505' safety service, which in an emergency directs a call straight through to a Maritime Rescue Co-ordination Centre (MRCC) – no matter how bad the weather conditions. So you can set sail knowing that your life is in safe hands.

Connectivity

Fleet One has a standard "plug and play" Ethernet connection to a computer, and with an optional wireless router can support smartphones, tablets and additional laptops – allowing multiple users to access the internet at the same time.

Unrivalled reliability

You can depend on Inmarsat, whatever the weather conditions. We provide the most robust communications links, with average network availability greater than any mobile phone provider and exceeding 99.9%.

Fleet One terminals are specifically designed for use within the maritime environment.

The terminal is quick and easy to install, with additional Wi-Fi capability to allow access to smartphones/tablets as at home. The terminals have been tested and approved to Inmarsat's exacting standards.

Fleet One equipment

	Antenna
	from
Diameter	27.5 cm
Height	22.1 cm
Weight	2.5 kg

The Fleet One service is offered with two different terminal options. Both have stabilised directional antennas providing the same service and meet Inmarsat and IEC standards.

Fleet One service

	Features
Data Standard IP	Up to 100kbps
Voice	4kbps AMBE+2
SMS	Standard 3G (up to 160 characters)

Applications

Fleet One supports an extensive range of applications:

Easy installation

Fleet One can be quickly and easily installed and set up on your boat. Terminals operate globally and standardised user interfaces are used by all manufacturers.

Fleet One coverage

Fleet One is supported by Inmarsat's global network coverage and capability, ensuring you are never out of touch wherever you are. What's more Fleet One is designed for fishing boats and offers tailored pricing in key fisheries grounds.

Cost-effective

With Fleet One, you can have performance and flexibility at affordable prices. Terminals are low cost, with a choice of airtime pricing to suit your needs. You don't have to commit to a lengthy contract and you can suspend use outside of fishing seasons. Alternatively, competitive rates are available on a pre-paid voucher with no commitment required. It makes global voice and regional data easily accessible, enabling you to achieve greater operational efficiency and improve crew welfare whilst keeping the costs of communications affordable.
